UAE gift: $2.7M for Irma aid in Collier

Relief money goes to school district, United Way, Grace Place

Liz Freeman
Naples Daily News | USA TODAY NETWORK – FLORIDA

Collier County is receiving $2.7 million from the United Arab Emirates to help with Hurricane Irma recovery for families still hard hit by the storm.

The Collier County School District and Grace Place for Children and Families are each receiving $1 million, and the United Way of Collier is being awarded $700,000.

The funding comes from $30 million the United Arab Emirates is dedicating to Florida as part of a tradition of helping communities in the United States that are devastated by natural disasters. Another $80 million is going to Texas.

Dana AI Mirashi, head of Heritage and Social Affairs at the UAE Embassy in Washington, D.C., said Tuesday the UAE reached out to Gov. Rick Scott’s office after Irma to see how it could help with relief.

From there, Volunteer Florida officials said Collier was hard hit by the September storm, and connections were made to the United Way, she said. The decision to earmark funds to Collier was made in December, and a site visit was done in January.

SLEEP THERAPY CAN SAVE LIVES

Robert Mayer knows he’s lucky to be alive, and it’s due to a sleep study that could just as easily not have happened. It led to a diagnosis of congestive heart failure for the 69-year-old retired New York City police officer who spends part of the year in Naples. His only symptom was a little fatigue and shortness of breath. But his wife noticed he would stop breathing at night.

He was diagnosed with a less common form of sleep apnea associated with heart failure, and he spent months on an external heart defibrillator until he had a defibrillator implanted recently at NCH Downtown Baker Hospital.

“They said there is a chance the sleep apnea could be a control factor why my heart got the way it is,” said Mayer, who has been fit and athletic all his life.

A good night’s sleep is no longer about counting sheep; the science behind shuteye and its impact on health is tremendous, experts say.

Another medical marijuana center opens in Naples

Two patient advocates stand ready at the recently opened Liberate Physician Center in Naples for patients to gain access to medical cannabis, but there still is no dispensary in Collier County.

For many patients in pain or suffering from symptoms or side effects, mainstream therapies don’t work any more — or never did — and they are anxious to try medical cannabis products if they qualify with any of the dozen medical conditions under Florida law where it is legal to use medical marijuana.

SpaceX
Continued from Page 3A
The upper-stage continued into orbit, firing an engine twice before releasing the roughly 12,800-pound “Merkat” satellite 32 minutes after liftoff. The launch was SpaceX’s 16th of the year, just three shy of last year’s total, and the 60th overall by Falcon 9 rocket since its debut in 2010. With the introduction of the upgraded Falcon 9 and its successful reflight, SpaceX begins in earnest its drive to transition reusable rockets from an experimental project into something more routine, like aircraft operations. If successful, that innovation over time promises to lower the cost of launches that SpaceX now advertises online for $52 million. CEO Elon Musk ultimately hopes to make it economical for an even bigger rocket — the Big Falcon Rocket, or BFR, to transport human settlers to Mars. And another company, Blue Origin, backed by Amazon CEO Jeff Bezos, has launched and landed its smaller, suborbital New Shepard booster up to five times. The company plans to reuse larger New Glenn rockets to be built in a new factory at KSC’s Exploration Park, possibly launching by 2023. SpaceX’s latest Falcon 9 booster should return to Port Canaveral within three or four days, and will then undergo inspections to determine its fitness for a third launch. Tuesday’s launch delivered a much-needed satellite to orbit for PT Telkom Indonesia, that country’s largest telecommunications and network provider. Formerly designated Telkom-4, the satellite renamed Merkat-Puth, representing the Indonesian flag’s red and white colors — will replace the Telkom-1 spacecraft launched in 1999. After 18 years of service, beyond its design life, Telkom-1 suffered a fuel leak a year ago and began to break apart in orbit, disrupting services. Flying 22,300 miles over the equator, in an orbital slot at 108 degrees East longitude, the new satellite, built by California-based SSL, will improve phone and internet service to the more than 17,000 islands of the Indonesian archipelago, as well as India and other parts of South Asia and Southeast Asia. “Satellite plays a vital role in our tele- communications infrastructure,” said Zulfiqar Ahlbid, Telkom’s chief technol- ogy officer. SpaceX is aiming for another commercial satellite launch from the Cape later this month — potentially its fourth launch in as many weeks. For now, the Eastern Range will pre- pare for a second launch in just over four days. A United Launch Alliance Delta IV Heavy rocket is ready-to-launch NASA’s 8.5 billion Parker Solar Probe mission to study the sun, targeting a 3:48 a.m. Saturday, Aug. 11, liftoff from Launch Complex 37. Irma aid
Continued from Page 1A
Al Marashi visited Grace Place on Tuesday to see how it serves local fami- lies. He will use its $1 million to help families in Immokalee recover from Irma, which destroyed six months earlier. “We have families who don’t have the means to pay insur- ance deductibles for home repairs and for other needs. There are families who will be in re- covery mode for five to seven years,” he said. “This is a huge gift to accelerate our recovery.” Sanderson said. Two other regions in Florida, Jack- sonville and Tallahassee, are receiving a share of the $10 million to Florida, Al
